

Task 1. ID: 7368

Choose the Astronauts

Place: **Earth**

Time: **3 years before Mission - 1 launching**

The success of an interplanetary mission depends largely on its crew.

The first manned mission to MARS is a fact.
Who are the 5 astronauts who will take the big step?

You are the Astronaut Corps Committee that chooses the astronauts for the Mission-1

There are 15 candidates out of 17000 applicants, in the final phase. You have to choose the 5 ones who will be on board.

Check the 15 cards with the candidates' profiles and make your final selection.

Using the app, pick the 5 astronauts of the crew
