

Task 2. ID: 3761

Load the Supplies

Place: Earth

Time: 1 month before
Mission - 1 launching

The space available inside the rocket is one of the biggest challenges in every space mission!

The Personal Preference Kits (PPKs) are approved containers used to carry the personal items and souvenirs of astronauts in Space missions.

You are a member of the Mars Mission-1 crew.

You have been given a list of 40 personal items that you could possibly take with you, but you have only 1000 g available...

Choose the items wisely, create your Personal Preference Kit (PPK), weigh, load and launch!

Using the app, pick the items and create your PPK
