Global Warming impact on natural disaster, especially wildfires

Key words:
global warming
natural disaster
wildfires

Topic: Global warming, natural disaster, wildfires

Students' age: 15-19

Time: 🕒 2 lessons

Subjects:
geography

Fire regime

Region name	Country	Monthly statistics (number of fires)			Fire season*			Absolute maximum of fires		Trend line	
		mean	month of maximum	month of minimum	length	beginning	end	number of fires	date	direction**	value***

* number of fire higher than the mean

** positive or negative

*** a parameter of lineal function

Fires spatial distribution

Region name	Country	Precipitation	Wet days	Temperature			Wind speed	Radiation	Vapour pressure
				Max	Mean	Min			
month of maximum									
month of minimum									

positive correlation
 negative correlation

Fire dependent species

Region name:

Species/landscape	Kind of dependency
